

better stay here and finish and we hope you can  
come see us this summer and we can plan later - Thank you so much.  
So glad and thankful you went to Manassa, Colo.  
see the Dr. so don't worry. hope I can  
be with you when you need me. I am  
feeling natural and real good. March 11. 1929.  
love to both from mother and baby.

Dear Elvera and Warren, send one a name.

I can't tell you how much I appreciate  
your gift remembrance with flowers  
and candy. And more than any thing  
else your attitude. and the best  
thing I can wish for you, is that you will  
have children to be so that full of you.

You are a dear sweet girl Elvera,  
you seem to understand - its the  
little things that make life worth  
living.

I received your flowers while I was  
yet in bed. they looked lovely in my  
bed room on the chest, under Grand-  
-mas picture, sorta connected the three  
of us. Sat. first day (tenth), I sat up  
just got reated in the dining<sup>room</sup> and  
the mail was brought in, bringing  
your candy. just made me feel you  
was quite near me. and to day again  
a letter come. and while baby sleeps

I'm trying to answer.

Baby came Feb. 28. two weeks before I planned. don't know why. he was fully matured. I was glad to be surprised that way. His birth was about like usual you wouldn't understand. so no use describing. - I had good help Pa Dr. Hurley & Myrtle Swafford, had Lula R. come afterwards and stay with me. most say baby looks like Jim or Elbert. I think his eyes will be blue. Ofcourse I wanted a baby girl. but sure thankful now for my baby boy and hope him perfect and well.

I will have a little fun for the next five years any way. he is sure sweet. Pa is proud of him two says if he can live to see him go on a mission he will feel like his lifes work is there. I told <sup>him</sup> I would be ready there too. I hope he can live to see his wish granted. Now about Josephine she is nearly or back to her self again. I had Dr. Hurley give her an examination he said her heart was all right now. said she must have had an acute attack of some thing to cause her heart to be that way for a while. but that she was growing so fast she needed rest and tonic. she is doing well in school on only about 8 more weeks so think she
